

ADDENDUM 2

RFB PW 27-17

SR85 BEAUTIFICATION PROJECT

This addendum is to answer the following questions:

1. Is there electrical power at the future Gateway sign, or do we need to put electrical power there for use by someone else later?

The vendor is tasked with installing power for the future Gateway sign that will be installed by others later.

2. Where will be the closest power source to pull from to install the power pole for the new irrigation well and timer?

There is a power pole located just between the plan location of the well and power supply backboard, it is displayed as a square with extension lines at opposite corners. It is more visible on the landscape plan between the second and third plant bed on the North side of the roadway on page L-PL-1.

3. Has the sod installation has been removed from the scope of work?

Correct, the sod has been removed from the installation of the project.
